

DrumQuik® UDA

3-Port Dispensing System for Professional Chemical Management

DrumQuik® 3-Port Universal Dispensing Adaptor (UDA) is an easy-to-use product for extracting liquids and chemicals from rigid containers in end-use applications. The reusable dip-tube can easily be moved from one container to the next without messy drips or spills and is more cost-effective than stainless steel “stingers.”

The 3-Port UDA features a 3/4" male NPT thread that mates with common containers, bung plugs and caps. The adaptor ports enable simultaneous chemical extraction, venting and application of blanket gas or air. In addition, the third port can be used to recirculate priming chemical to the container in metering pump applications. DrumQuik 3-Port UDA facilitates easy, spill-free drum changeouts and offers unprecedented flexibility in a closed system for safely dispensing chemicals. Optional system components including foot valves, air filters and vent check valves are also available.

FEATURES	BENEFITS
3/4" male NPT thread	Mates with steel and plastic drums, IBCs, jerry cans and Nalgene® bottles
3-port design	Enables flexible system configuration based on application needs
Mates with Colder couplings	Easily disconnect/reconnect system tubing
Standard bung plug and cap accessories available	Easily connect to virtually any container
